Going beyond study at Sunway

LOOKING for a college offering a comprehensive choice of courses from pre-university to degree level? Sunway College may be your answer as it offers a variety of courses from Accountancy, Banking and Finance, Economics, Information Technology and Multimedia, Engineering to Hospitality and Management.

Come and visit the Sunway College booths during The Star's Education Fair for more information. Its team of lecturers will be present on Feb 17 and 18 and can answer your queries.

“Our lecturers will be able to help any student who visits the Sunway booth. This is the best time for students interested in a particular course or seeking advice about what to do next, to talk to these lecturers,” says college principal Elizabeth Lee.

Students can take career tests which help to decide what the most suitable career for them is.

“Sunway is a one-stop educational institution as the student can start with a pre-university course and proceed to degree level. Once he has graduated, we will also help with job placements,” she says.

Lee explains that Sunway offers four pre-university courses which are the GCE A-Level, Australian Matriculation, Canadian International Matriculation Programme and Monash University Foundation Year.

These pre-university courses provide a firm foundation for university studies with options that suit different requirements.

Sunway also offers various degree options including 3+0 programmes and twinning degrees. “Sunway has links to universities in the United States, United Kingdom and Australia and students can choose to do a wide variety of courses.”

A conversion Master of Science (MSc) in Information Technology (IT) is also offered. This is for those whose first degree was not in IT, but who wish to complete a Masters in it.

In addition, Sunway also provides a range of professional diploma and financial courses as well as English Language programmes.

“We want to produce leaders of the future and we can’t just say so without doing anything to prepare our students. So during their time at Sunway, students also take courses in leadership, time management and study skills,” she says.

Aside from academic work, there is also a wide choice of extra-curricular activities and sports to choose from. — by KAREN CHAPMAN
