Best for less at Sunway College

SUNWAY College occupies a pre-eminent position in the development of tertiary education in Malaysia.

Advantages offered include substantial cost savings compared to going straight to an overseas university; and reducing culture shock as students get a gradual transition to university life in familiar surroundings.

Founded in 1987, Sunway College has strong links with three highly reputed universities in Britain, Australia and the US. They are University of Greenwich, Victoria University of Technology (VicUni) and Western Michigan University (WMU).

Sunway College's collaboration with University of Greenwich currently offers three degree programmes - B.Sc. (Hons) Building Surveying, B.Sc. (Hons) Estate Management and B.Sc. (Hons) Quantity Surveying. Sunway began twinning arrangements with Greenwich University in 1994, offering these courses through a partnership with the university's School of Land and Construction Management.

Under this twinning programme, students undertaking their degree in building surveying can opt to spend up to two years at Sunway College and complete their degree at the university which is made up of six main campuses centred in the historic area of Greenwich in London.

The School of Land and Construction Management at the University of Greenwich is proud of the quality ratings it has achieved. In 1997, it was awarded an excellent 'bill of health' by the Higher Education Funding Council of England (HEFCE) after undergoing an extensive quality assessment and scoring 21 points out of a possible 24.

Founded more than 100 years ago, the University of Greenwich has a proud tradition of educational excellence and a long tradition of welcoming international students — currently standing at more than 1,000 students from more than 70 countries including Malaysia, Singapore and Hongkong.

The next intake is on Jan 8.

To find out more about courses and have a feel of the facilities at the college, parents, students and relatives are invited to visit Sunway College Open Day on Dec 10.

Visitors to the event may also sit through free testing services in English Language proficiency, and career attitudes and interests.

The Open Day will also include presentations on opportunities in higher education as well as career guidance and counselling session.
