Sunway route to a British IT degree

By Jasbir Singh

GET an honours degree from a British university at Sunway College through its special degree route which offers qualifications in Computing and Information Systems from the London Guildhall University.

Sunway College is the first to offer the course in collaboration with the National Computing Centre.

The programme is ideal for students with Sijil Pelajaran Malaysia/O-level/MICSS qualifications.

Students who do not meet the entry requirements can take up the Basic Certificate in Information Technology. Certificate holders can enrol into the diploma level which leads them to the NCC International Diploma in Computer Studies qualification.

Those who take up the programme will be able to analyse and develop computer-based systems and gain employment as business systems analysts.

The diploma courses are offered on a part-time basis and take a year to complete.

Diploma holders can gain entry into the fourth semester of the International Diploma in Computer Studies programme.

Sunway also offers the Microsoft Certified Systems Engineer course and is an authorised training centre for UBS Accounting Software, Mailnet Financial Software and the Value Added Instructional Programme by Sun Microsystems.
